Title: Chief Financial Officer

## **Osem-Nestle Expands Installation of the SaverOne Protection System Across its Fleet**

**A new follow-on order for 50 SaverOne Systems with the Israeli subsidiary of a global food manufacturer, representing long-term growth potential**

**Petah Tikvah, Israel, November 21, 2022** – SaverOne 2014 Ltd. (Nasdaq: SVRE, TASE: SVRE), a technology company engaged in transportation safety solutions, today announced that Osem-Nestle has ordered 50 new SaverOne Systems which are being installed on their employee vehicles. Furthermore, additional systems are expected to be installed at a later stage with an eventual goal of equipping their full company's fleet of cars and trucks with the SaverOne system.

This new order follows a successful six-month trial period covering an initial 30 vehicles, under which all aspects of the system were tested. At the close of the trial period, Osem-Nestle conducted an internal survey among users and SaverOne's system received very high satisfaction grades with feedback that the system gives them peace of mind while driving and prevents them from cell phone distractions.

Osem-Nestle is one of the largest food manufacturers and distributors in Israel, and is owned by Nestle of Switzerland, a multinational food and beverage company with 270,000 employees and operating in 186 countries.

**Mr. Gilboa, CEO of SaverOne commented**, "We are pleased with this follow-on order from Osem-Nestle, a key customer, which presents strong long-term growth potential for SaverOne. It represents an opportunity to further penetrate and expand sales into the global organization. This new follow-on order is important, demonstrating the success of our product in the initial trials with Osem-Nestle and it also shows the strong value that they see in providing this protection system for their employees. Finally, it is a testament to the ongoing success we are seeing in executing our growth strategy and building relationships with multinational organizations."

### **About the SaverOne System**

SaverOne's system is installed in vehicles to provide a solution to the problem of driver distraction, as a result of drivers using distracting applications on the mobile phone while driving, in a way that endangers their safety and the safety of their passengers. This phenomenon is considered one of the main causes of road accidents in the world. According to the US National Highway Traffic Safety Administration, the annual cost of road accidents just in the United States, stands at about \$870 billion each year, excluding the costs of serious injury or death, with a quarter of those accidents estimated to be related to the use of the mobile phones while driving. SaverOne's technology specifically recognizes the driver area in the vehicle and prevents the driver from accessing distracting applications such as messaging, while allowing others (e.g. navigation), without user intervention or consent, creating a safer driving environment.

SaverOne's primary target markets include commercial and private vehicle fleets that are interested in reducing potential damages and significant cost, vehicle manufacturers that are interested in integrating safety solutions to their vehicles, and insurance and leasing companies. SaverOne initially addresses car fleets with focus on the Israeli, European and US markets, as well as other markets around the world. SaverOne believes that ultimately increased focus on monitoring and prevention of cellular distraction systems in vehicles, in particular driven by upcoming expected EU regulation, will likely have a dramatic positive impact on the demand for its systems in the future.

The Company's strategy is to provide its technology for installation to customers in the aftermarket as well as address OEM vehicle manufacturers, to install the Company's protection technologies during the vehicle manufacturing process.

### **About SaverOne**

SaverOne is a technology company engaged in the design, development and commercialization of OEM and aftermarket solutions and technologies, to lower the risk of, and prevent, vehicle accidents.

SaverOne's initial line of products is a suite of solutions that saves lives by preventing car accidents resulting from distraction from the use of mobile phones while driving. SaverOne is also developing a sensor system for early location and direction detection under all visibility conditions of vulnerable road users (VRU) through their cellphone footprint.
